

WOULD YOU LIKE TO CONTRIBUTE TO CREATING A NEW WORLDWIDE STANDARD FOR MANAGING AND OPTIMISING GLOBAL TRANSPORTATION FLOWS?

Position of Java Software Developer

BlueRock Logistics - 's Hertogenbosch, The Netherlands.

Job description

The position of Software Developer relates to the international roll-out of our operative and analytical software platform. We are creating a world-wide standard for large and small companies. You will be part of our development team and work together with business analysts, project managers and modellers in implementations and in the continuous further development of the software, the algorithms and the user interaction.

What are we looking for?

An enthusiastic team player with a minimum of 5 years working experience and a drive to make a difference. Necessary traits for the successful candidate include evidence of:

- Skilled in Java, web development (preferably JSF) and SQL;
- A natural interest and passion for logic since childhood (whether it is with programming, playing chess, gaming making device, etc.);
- Ability to work in teams. There will be close co-operation with international business analysts (fluent in English is needed);
- Creative, problem solver;
- Affinity with logistics and transportation processes is a plus.

After a first interview - in person or via Skype - a second step will be for you to perform a challenging technical test. We are looking for some-one with a natural talent to solve complex problems using Java code.

Who we are

We support logistics service providers and shippers to simplify their supply chain. We are on the fore-front of technology development and active in the scientific community of data science and logistics.

Our proposition is state-of-the-art. With an App based architecture, modern screen design and our expertise in logistics, software as well as in modelling/optimising we draw the attention of many industries.

Our main customers are in France, Germany, Italy, Benelux and other European countries. In addition we are active and expanding in the US. Eventually we need to support our customers globally.

What we offer

An attractive work environment: good team spirit, international team, bottom-up responsibility sharing instead of top-down, result-oriented instead of effort oriented, self-development, working together with the best in the industry, achieving great things.

This position has growth potential – the organisation is building up. The first years will be in 's Hertogenbosch. There will be many opportunities later-on as we are expanding in geographical scope (offices in Italy and US are planned in the next 1-2 years) and in the services we offer.
